Account History & Compliance Notes

Reference: US-C-C3-000820 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

This client relationship originated from an inbound request submitted via the partner portal in 2019. The legal onboarding process took approximately eleven weeks due to prolonged negotiations over data processing addenda, particularly around sub-processor disclosure obligations and the scope of the audit rights clause. Several rounds of redlines were exchanged before a mutually acceptable version of the data processing agreement was finalised.

Utilisation patterns reviewed during the Q4 2023 audit revealed that actual seat consumption peaked at 343 concurrent users, significantly below the 500 seats contracted. The compliance team flagged this underutilisation in their quarterly review report and recommended initiating a commercial renegotiation to right-size the license, though the account manager advised against it given the client's stated expansion plans for the following fiscal year.

This is one of the longer-standing active accounts in the portfolio, having maintained continuous compliance status since initial onboarding. The SysAnalytics team has proactively engaged with compliance training resources provided and has on two occasions served as a positive reference for the onboarding of new licensees within their industry sector.

No material concerns are currently flagged for this account. Standard renewal processing is recommended. The account manager has been advised to use the upcoming renewal engagement as an opportunity to discuss the client's forward roadmap and assess scope for appropriate expansion of the licensed services.
