Account History & Compliance Notes

Reference: US-C-C3-000873 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The licensing relationship was established as part of a broader enterprise agreement covering multiple subsidiaries. The InfoHub entity was carved out as a standalone license holder at the request of their group legal counsel, who sought to isolate liability at the operating entity level rather than the holding company. This structure required additional KYC documentation and a supplementary counterparty risk assessment.

Usage logs obtained during the H1 2024 compliance review indicated that the integration layer was being accessed by a third-party contractor engaged by InfoHub, which was not disclosed as a permitted sub-user in the original agreement. The client was notified via formal letter and subsequently provided written confirmation that the contractor access had been terminated and access credentials revoked.

Given the pattern of recurring minor non-conformances, the account has been designated for an enhanced compliance engagement programme for the next review period. This will involve increased audit frequency and mandatory participation in compliance briefings provided to the client's relevant staff.

From a commercial perspective, the account has historically maintained a good payment record, with the exception of a brief late-payment episode in 2022 that was attributed to a treasury system transition at InfoHub. A late payment charge was waived as a goodwill gesture given the client's otherwise clean financial history with the organisation.
