Account History & Compliance Notes

Reference: US-C-C4-000891 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

This client relationship originated from an inbound request submitted via the partner portal in 2021. The legal onboarding process took approximately eleven weeks due to prolonged negotiations over data processing addenda, particularly around sub-processor disclosure obligations and the scope of the audit rights clause. Several rounds of redlines were exchanged before a mutually acceptable version of the data processing agreement was finalised.

Usage logs obtained during the H1 2024 compliance review indicated that the integration layer was being accessed by a third-party contractor engaged by CorePartners, which was not disclosed as a permitted sub-user in the original agreement. The client was notified via formal letter and subsequently provided written confirmation that the contractor access had been terminated and access credentials revoked.

The software deployment is operating on a version that is approaching end-of-support status. The client has been formally notified and has indicated an intention to plan the upgrade within the next scheduled maintenance window. This item is tracked in the account risk register and will be verified at the next scheduled technical check-in.

Invoice disputes have been minimal throughout the relationship. A single billing discrepancy was raised relating to pro-rated charges following a mid-cycle seat adjustment request. The matter was resolved promptly following clarification from the finance team, and no further disputes have been recorded.
