Seats Licensed	1

Account History & Compliance Notes

Reference: US-C-C5-000939 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The licensing relationship was established as part of a broader enterprise agreement covering multiple subsidiaries. The CyberAnalytics entity was carved out as a standalone license holder at the request of their group legal counsel, who sought to isolate liability at the operating entity level rather than the holding company. This structure required additional KYC documentation and a supplementary counterparty risk assessment.

The finance team has been the primary user base since initial deployment, with occasional cross-departmental access granted on an ad-hoc basis by the client's internal IT administrator. The compliance team has repeatedly noted the absence of a formal internal user provisioning process at the client side, which creates tracking difficulties and was cited as a control weakness in the last two consecutive audit cycles.

Invoice disputes have been minimal throughout the relationship. A single billing discrepancy was raised relating to pro-rated charges following a mid-cycle seat adjustment request. The matter was resolved promptly following clarification from the finance team, and no further disputes have been recorded.

The renewal process was initiated within the contractual notice window, but negotiations have been extended due to CyberAnalytics's request for modified terms including expanded data residency provisions and a reduction in the minimum seat commitment threshold. Commercial discussions are ongoing, and the account has been extended on a month-to-month basis at the existing contractual rate pending execution of the renewal agreement.
