IP Address Bound	182.249.58.52
MAC Address Bound	FF:F4:F5:6E:C1:98

— Continued (Section 5) —

Department	*Engineering*
Approved By	Betty Davis
Approval Date	2024-06-07
SLA Level	*Platinum*
Uptime Guarantee (%)	99.99
Support Hours	8x5
Data Classification	*Top Secret*
Encryption Required	RSA-2048

Audit Frequency	Annual
Renewal Frequency	Monthly
Auto-Renew	Yes
Cancellation Notice (Days)	60
Notes	Beta access included
Internal Reference	REF-44309
Hash Signature	7671686e27805d65998fb002ad5d3ad7

Account History & Compliance Notes

Reference: US-D-D2-001148 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

This client relationship originated from an inbound request submitted via the partner portal in 2021. The legal onboarding process took approximately eleven weeks due to prolonged negotiations over data processing addenda, particularly around sub-processor disclosure obligations and the scope of the audit rights clause. Several rounds of redlines were exchanged before a mutually acceptable version of the data processing agreement was finalised.

Usage logs obtained during the Q4 2023 compliance review indicated that the integration layer was being accessed by a third-party contractor engaged by OmegaDigital, which was not disclosed as a permitted sub-user in the original agreement. The client was notified via formal letter and subsequently provided written confirmation that the contractor access had been terminated and access credentials revoked.

Expiry of this license followed a deliberate and communicated decision by OmegaDigital to consolidate their technology stack as part of an enterprise-wide cost reduction programme. A formal notice of non-renewal was received in writing from their executive team on 2024-06-25. The account was closed in good standing with all outstanding financial obligations settled prior to the expiry date.

Technical support interactions have been moderate in volume, primarily relating to API rate configuration and user provisioning workflows. No severity-one incidents have been logged against this account during the current contract period. The client's technical team has been responsive to security advisories and has applied critical patches within the recommended remediation windows.
