Account History & Compliance Notes

Reference: US-D-D2-001162 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was migrated from a legacy reseller arrangement in 2023 when the original distribution partner ceased operations. The transition was managed by the regional partner success team and involved re-signing the master license agreement with updated data processing terms. Several weeks of parallel access were provided to allow the client to verify continuity of service before the legacy arrangement was formally terminated.

Utilisation patterns reviewed during the Q2 2025 audit revealed that actual seat consumption peaked at 92 concurrent users, significantly below the 250 seats contracted. The compliance team flagged this underutilisation in their quarterly review report and recommended initiating a commercial renegotiation to right-size the license, though the account manager advised against it given the client's stated expansion plans for the following fiscal year.

From a technical standpoint, the deployment has been stable with no major service incidents reported to the support function. The client completed the mandatory security configuration review within the required timeframe and holds a current penetration test certificate on file. Integration with their existing identity management infrastructure was completed without material issues.

Revocation was triggered by persistent non-payment of invoices outstanding beyond the contractual grace period, compounded by the discovery during a routine compliance check that the software continued to be operated without authorisation. The account was placed on a legal hold status concurrently with the revocation notice, pending assessment of potential damages and recovery options.

Given the pattern of recurring minor non-conformances, the account has been designated for an enhanced compliance engagement programme for the next review period. This will involve increased audit frequency and mandatory participation in compliance briefings provided to the client's relevant staff.
