Account History & Compliance Notes

Reference: US-D-D6-001385 • Classification: RESTRICTED — COMPLIANCE TEAM ONLY • 2026-04-15

The account was migrated from a legacy reseller arrangement in 2023 when the original distribution partner ceased operations. The transition was managed by the regional partner success team and involved re-signing the master license agreement with updated data processing terms. Several weeks of parallel access were provided to allow the client to verify continuity of service before the legacy arrangement was formally terminated.

Usage logs obtained during the Q1 2024 compliance review indicated that the integration layer was being accessed by a third-party contractor engaged by DigiAnalytics, which was not disclosed as a permitted sub-user in the original agreement. The client was notified via formal letter and subsequently provided written confirmation that the contractor access had been terminated and access credentials revoked.

The compliance team recommends maintaining the current monitoring frequency for this account and scheduling a structured review meeting with the client's compliance function to address the outstanding items. A detailed remediation tracking log should be maintained by the assigned compliance officer until all open points are formally closed.

The current suspension was imposed as a precautionary measure pending the outcome of an internal investigation at DigiAnalytics following an incident involving a key user with elevated system privileges. The suspension was agreed mutually with the client's legal team as a risk containment measure and is expected to be lifted subject to satisfactory resolution and formal sign-off from the compliance committee.
